SUSTAINABLE DEVELOPMENT GOALS

SDG 4 QUALITY EDUCATION

4.2 Proportion of graduates with teaching qualification

4 QUALITY EDUCATION

4.2.1: Proportion of Graduates with Relevant Qualification for Teaching

Reporting Period: School Year 2024–2025

Eastern Samar State University (ESSU) contributes to the development of the primary education workforce by producing graduates who gained a qualification that entitled them to teach at primary school level. For School Year 2024–2025, the university recorded a total headcount number of 753 graduates at all levels across its Borongan, Can-avid, Maydolong, Salcedo, and Guiuan campuses. Of this total, 515 graduates gained a qualification that entitled them to teach at primary school level, representing a proportion of 0.684 of the university's total number of graduates.

The distribution of graduates with relevant teaching qualifications across the university's campuses demonstrates ESSU's contribution to ensuring that primary education is adequately resourced. Borongan Campus recorded 57 graduates with a relevant qualification out of 108 graduates, equivalent to a proportion of 0.528. Can-avid Campus recorded 128 out of 148 graduates, equivalent to 0.865. Maydolong Campus produced 68 graduates with a relevant qualification out of 105 graduates, equivalent to 0.648. Salcedo Campus recorded 146 out of 213 graduates, equivalent to 0.685, while Guiuan Campus recorded 116 out of 179 graduates, equivalent to 0.648.

These figures demonstrate that a substantial proportion of ESSU's graduates gained a qualification that entitled them to teach at primary school level. Through its teacher education programs across its campuses, ESSU supports the preparation of qualified educators who can contribute to the provision of primary education in the Philippines. This contribution is aligned with UN Sustainable Development Goal 4, particularly Target 4.c, which emphasizes increasing the supply of qualified teachers, including through international cooperation for teacher training in developing countries.

Figure 1. Proportion of graduates with qualifications entitling them to teach at primary school level

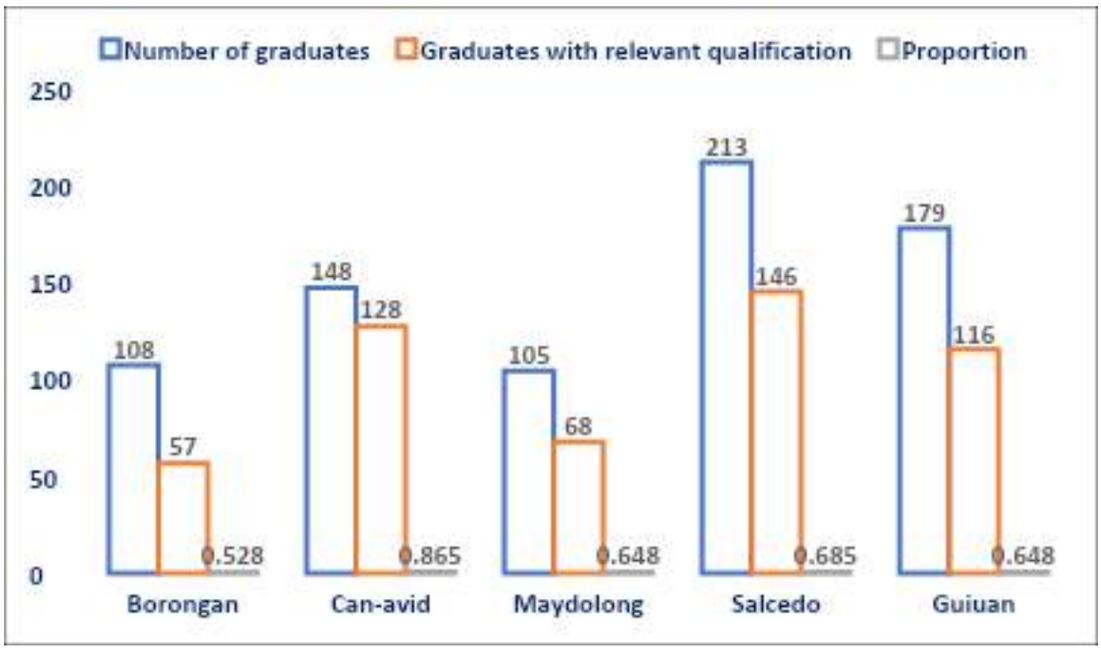

Table 1. Supporting Numerical Data

Campus	Number of graduates	Graduates with relevant qualification	Proportion
Borongan	108	57	0.528
Can-avid	148	128	0.865
Maydolong	105	68	0.648
Salcedo	213	146	0.685
Guiuan	179	116	0.648
Total	**753**	**515**	**0.684**

SUSTAINABLE DEVELOPMENT GOALS

SDG 4 QUALITY EDUCATION

4.3 Lifelong learning measures

4 QUALITY EDUCATION

Indicator 4.3.1: Public Resources (Lifelong Learning)

Reporting Year: School Year 2024 - 2025

Eastern Samar State University (ESSU) advances lifelong learning by extending access to its educational resources, library facilities, and learning opportunities beyond its enrolled student population. Recognizing that opportunities for learning should not be limited to individuals formally enrolled in higher education, the University provides eligible external users with free access to its physical library facilities and online educational resources. Through an institutional referral arrangement, individuals who are not studying at ESSU may access its library resources upon referral from the head of their respective institutions. This arrangement demonstrates the University's commitment to making educational and research resources available to the wider public and supporting learning beyond formal academic enrollment.

1. Free Access to Educational Resources for Those Not Studying at the University

ESSU opens its library resources to individuals outside its enrolled student population, allowing eligible members of the public to benefit from the University's educational and research collections. External users may access the University's physical library resources upon referral from the head of their respective institutions. This arrangement provides a mechanism through which non-enrolled individuals can use institutional learning resources for independent study, academic inquiry, information gathering, and continuing education.

Importantly, access to these library resources is provided free of charge to eligible external users. By extending its library services beyond its enrolled students, ESSU helps address barriers to educational information and provides members of the wider community with opportunities to access reliable learning materials without requiring university enrollment or payment for library access.

Library Facility

Fiction

OPAC
OPAC

Basic Collection

Digital Resources
and Services

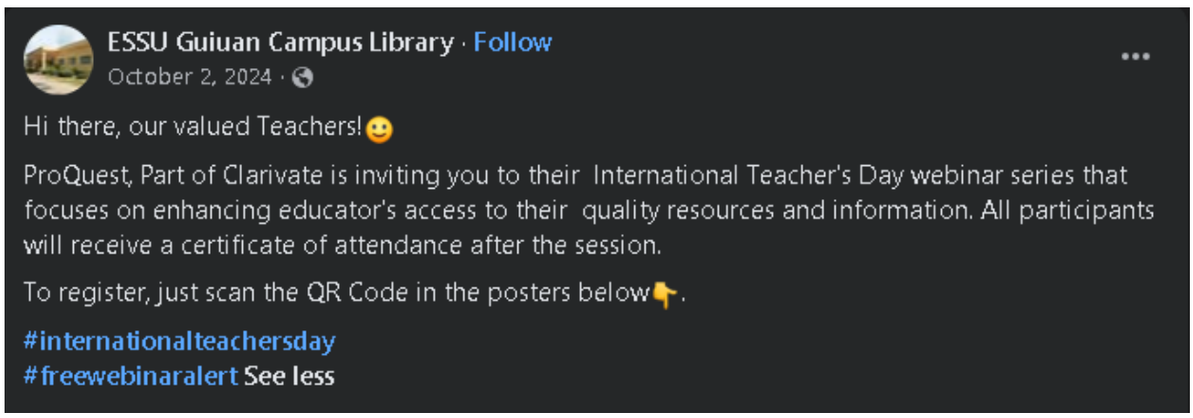

2. Free Courses and Learning Opportunities Leading to a Certificate or Award

ESSU Guiuan Campus also promotes opportunities for continuing professional learning by disseminating information about free educational activities offered in collaboration with external knowledge and resource providers.

On October 2, 2024, ESSU Guiuan shared an invitation through its official Facebook page for the ProQuest, Part of Clarivate International Teacher's Day Webinar Series. The webinar series focused on enhancing educators' access to quality resources and information. According to the invitation, all participants would receive a certificate of attendance after the session.

This learning opportunity enabled educators and other interested participants to engage with professional development content concerning access to educational and research resources. The provision of a certificate of attendance also offered participants formal recognition of their engagement in the learning activity.

Through the promotion of such free learning opportunities, ESSU helps connect educators and the wider academic community with professional development activities beyond its regular academic programs.

3. Free Access to Campus Facilities and Equipment

ESSU extends access to its library facilities beyond its enrolled student population by allowing eligible external users to use its physical library resources upon referral from the head of their respective institutions. This arrangement makes the University's library facilities accessible to individuals who are not formally enrolled at ESSU and provides them with an institutional space for accessing educational and research materials.

The public library arrangement represents ESSU's contribution to widening access to institutional learning facilities. It supports external users who require library resources for independent learning, academic research, and continuing education. This provision specifically concerns access to library facilities and resources; it does not imply unrestricted or free access to all campus facilities and equipment.

4. Free Access to Online Resources

Complementing its physical library services, ESSU provides free access to online library services and electronic educational resources for eligible external users. These digital services extend the University's contribution to lifelong learning beyond the physical campus, enabling users to access scholarly information and obtain research assistance through online channels.

The University's online library services include:

- Access to Online Databases – Provides access to a wide variety of scholarly articles, electronic journals, e-books, and other digital resources.
- Virtual Reference Service – Makes library personnel available for online consultations through email, chat, text, or telephone.
- Research Assistance – Provides personalized research support, citation guidance, and assistance in navigating online academic resources.

ESSU's electronic library collections include the following:

1. ProQuest Research Library
2. Philippine E-Journals
3. Gale Research
4. Bibliotex Digital Library
5. OECD iLibrary
6. Wiley E-books

These online services and electronic resources are provided free of charge to eligible external users, subject to the University's established access and referral arrangements.

Through these resources, individuals outside ESSU can obtain scholarly information, explore academic publications, access digital learning materials, and receive research assistance without additional charges for the library services.

The availability of these online resources is particularly valuable for individuals who seek educational and research materials beyond traditional classroom settings. By making digital knowledge resources accessible to non-enrolled users, ESSU provides additional opportunities for independent learning, information literacy, and continuing academic and professional development.

Library Online Resources:

1. ProQuest Research Library

Description:

- Access thousands of full-text scholarly journals, magazines, and dissertations.
- Explore reliable, peer-reviewed resources across multiple disciplines.
- Support assignments, research, and thesis writing.
- Enhance teaching, learning, and academic research.

Best for:

- Literature reviews
- Research papers and theses
- Class assignments
- Faculty research and publication
- Evidence-based academic studies

2. Philippine E-Journals

Description:

- Access peer-reviewed journals published by Philippine universities and professional organizations.
- Discover local research across various academic disciplines.
- Support assignments, research, and thesis writing with credible Philippine studies.

Best for:

- Research on Philippine topics
- Assignments and class projects
- Thesis and dissertation writing
- Faculty and student research
- Local and regional studies

3. GALE Research Complete

Description:

- Access millions of scholarly articles, e-books, and primary sources.
- Explore multidisciplinary content for teaching, learning, and research.
- Find trusted, peer-reviewed resources across a wide range of subjects.
- Support assignments, research papers, and academic projects.

Best for:

- Multidisciplinary research
- Assignments and research papers
- Thesis and dissertation writing
- Faculty research
- Teaching and curriculum support

5. Wiley eBooks

Description:

- Access a wide collection of trusted academic and professional e-books.
- Read online or offline using the Bookshelf app.
- Support learning, teaching, and research across various disciplines.
- Access your e-books anytime, anywhere.

Best for:

- E-book reading
- Course references
- Assignments and research
- Thesis and dissertation writing
- Faculty and student learning

Institutional Impact and Contribution to Lifelong Learning

ESSU's public library services, free online educational resources, and promotion of professional learning opportunities demonstrate its commitment to extending educational benefits beyond its enrolled student population. Rather than limiting its institutional resources to individuals formally pursuing degree programs, the University makes selected learning facilities, scholarly collections, digital resources, and research support services accessible to eligible external users.

The impact of these initiatives is reflected in the expanded opportunities for individuals outside the University to access reliable educational information, pursue independent learning, strengthen research competencies, and participate in continuing professional development. The free provision of these resources also helps reduce financial barriers that may otherwise limit access to scholarly publications, electronic learning materials, and academic assistance.

Through its public library access arrangements, ESSU provides an institutional avenue for non-enrolled individuals to benefit from university-based educational resources. Its online library services further complement this initiative by making scholarly information and research assistance available through digital channels. Meanwhile, its promotion of free professional learning activities, such as the ProQuest International Teacher's Day Webinar Series, connects educators with opportunities to enhance their knowledge and professional competencies.

Ultimately, ESSU demonstrates that the University's contribution to quality education extends beyond formal enrollment and degree completion. By providing free access to educational resources for those not studying at the university, the institution supports a more inclusive learning environment in which members of the wider community can continue acquiring knowledge, developing competencies, and pursuing personal and professional growth throughout their lives.

Indicator 4.3.2: Public Resources (Lifelong Learning)

ESSU Host Educational Events that are Open to the General Public.

Reporting Year: 2025

A. Free Public Educational Events

Eastern Samar State University (ESSU) provides lifelong learning opportunities through educational events hosted by the University that are open to the general public and offered free of charge. Through its campuses and academic colleges, ESSU extends educational opportunities beyond its enrolled student population by engaging local communities, partner institutions, and other external stakeholders in learning activities that develop practical knowledge, competencies, and awareness of issues relevant to their respective communities.

In 2025, ESSU implemented two community-based educational initiatives through ESSU Maydolong and ESSU Guiuan. These initiatives demonstrate the University's efforts to make learning accessible to the general public through free educational activities addressing disaster preparedness, literacy, and numeracy.

1. Barangay Disaster Preparedness Seminar

The College of Criminal Justice Education of ESSU Maydolong, in partnership with the Municipal Disaster Risk Reduction and Management Office (MDRRMO) of Llorente, conducted a series of Barangay Disaster Preparedness Seminars in 2025. The educational activities provided community members with opportunities to acquire knowledge and practical understanding of disaster preparedness, risk awareness, and community-level disaster risk reduction and management.

The seminars were conducted on six separate dates, with each activity lasting eight hours.

Date of implementation	Beneficiary attendances
March 6, 2025	180
March 13, 2025	75
March 19, 2025	133
March 27, 2025	133
March 28, 2025	76
June 30, 2025	76
Total	**673**

Through these activities, ESSU Maydolong recorded 673 beneficiary attendances across 48 hours of educational sessions. The partnership with MDRRMO Llorente strengthened the

connection between university-based knowledge and local disaster preparedness initiatives, allowing educational interventions to reach community members outside the University's formal academic setting.

The activity contributes to lifelong learning by extending disaster risk education to the general public and strengthening community knowledge and preparedness. It also supports the development of more informed and resilient communities by providing learning opportunities relevant to local disaster risks and emergency preparedness.

2. BEED-LINE (Literacy Instruction and Numeracy Enhancement)

The College of Education of ESSU Guiuan implemented BEED-LINE (Literacy Instruction and Numeracy Enhancement) in partnership with the Barangay Local Government Units of Sapao and Tagporo and the Department of Education. The initiative provided educational opportunities focused on strengthening foundational literacy and numeracy skills among community beneficiaries.

The activities were conducted on five separate dates in 2025, with each session lasting eight hours.

Date of implementation	Beneficiary attendances
March 15, 2025	25
November 22, 2025	25
December 6, 2025	25
December 7, 2025	25
December 14, 2025	25
Total	**125**

The initiative recorded 125 beneficiary attendances over 40 hours of educational sessions. Through collaboration with local barangays and the Department of Education, ESSU Guiuan extended its educational services beyond the University and provided opportunities for community members to strengthen essential literacy and numeracy competencies.

BEED-LINE demonstrates the University's contribution to lifelong learning by supporting foundational learning outside the conventional classroom environment. By bringing literacy and numeracy instruction closer to the community, ESSU helps promote continuing access to education and the development of essential competencies that individuals can use in their everyday lives.

Consolidated Impact of Free Public Educational Events

The two initiatives demonstrate ESSU's efforts to host educational events that extend learning opportunities to the general public and contribute to community development.

Collectively, these educational activities illustrate how ESSU translates its commitment to quality education into accessible, community-oriented learning opportunities. By providing free educational events on disaster preparedness, literacy, and numeracy, the University supports the acquisition of practical knowledge and competencies while strengthening the capacity of communities to respond to their educational and developmental needs.

These initiatives also demonstrate the role of higher education institutions in advancing lifelong learning beyond formal enrollment by engaging external beneficiaries and collaborating with local government units and public institutions to deliver relevant educational interventions.

B. Charged Public Educational Events

12th International Conference on Integrative Disaster Risk Reduction and Management (ICIDRRM)

Host Institution: Eastern Samar State University

ESSU hosted the 12th International Conference on Integrative Disaster Risk Reduction and Management (ICIDRRM) on November 26–28, 2025, through an online modality. Guided by the theme "Bridging Academia and Action: Integrating Research, Policy, and Practice in Disaster Risk Reduction Management," the international conference provided an educational platform for researchers, educators, disaster risk reduction practitioners, policymakers, and other stakeholders to exchange knowledge, present research, and discuss approaches to strengthening disaster resilience.

The conference featured plenary talks, thematic sessions, masterclasses, and exhibits, addressing the integration of research, policy, and practice in disaster risk reduction and management. Its thematic areas included:

1. Disaster Risk Education and Curriculum Innovation in Academia;
2. University-Community Linkages for Crisis Preparedness and Recovery; and
3. Policy, Planning, and Research for Disaster-Resilient Tourism Destinations.

The conference pursued the following objectives:

- Facilitate strategic partnerships among government entities, private sector organizations, NGOs, academia, and local communities for effective disaster risk reduction and management;
- Showcase research, successful case studies, and technologies that enhance disaster resilience;
- Provide a collaborative platform for developing comprehensive policies and promoting coordinated disaster management efforts;
- Empower local communities through education and participatory planning; and
- Explore approaches to integrating futures thinking and the United Nations Sustainable Development Goals into disaster risk reduction initiatives.

Participation in the conference was subject to the following registration fees:

- Virtual participant with paper presentation PHP 2,500
- Virtual participant without paper presentation PHP 1,000

The conference contributed to continuing professional and academic learning by providing opportunities for participants to acquire new knowledge, exchange research findings, and engage with emerging approaches to disaster risk reduction. It also strengthened academic and institutional linkages by bringing together stakeholders from different sectors and professional backgrounds.

Through this initiative, ESSU supported knowledge sharing and the application of research to practical disaster risk governance and community resilience. However, because participation required payment of registration fees, this activity is classified as a charged educational event and is presented separately from the University's free public educational events.

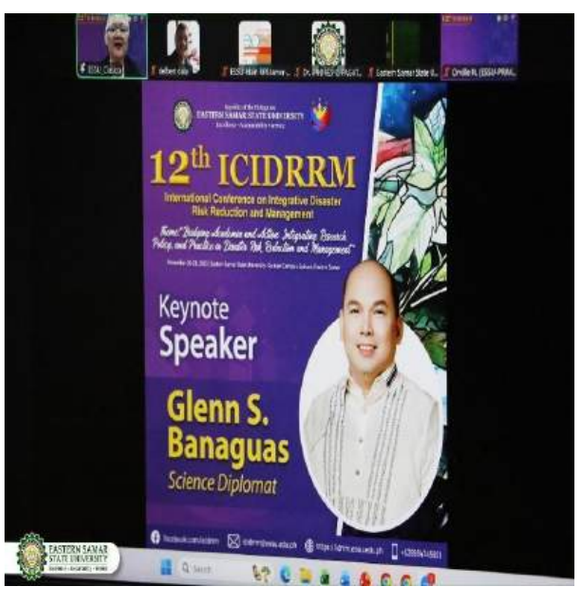

For Indicator 4.3.2, the free public educational events serve as the primary evidence of compliance with the free-events requirement, while the ICIDRRM is documented separately as a charged educational event.

Science Diplomat

C. Overall Contribution to Lifelong Learning

Through its free and charged educational events in 2025, Eastern Samar State University demonstrated its role in providing lifelong learning opportunities through educational activities addressing community education, disaster preparedness, foundational literacy and numeracy, and professional knowledge exchange.

The free public educational events directly demonstrate the University's efforts to make learning opportunities accessible to the general public without financial barriers. Meanwhile, the charged international conference provides an additional avenue for continuing professional and academic development through research dissemination and interdisciplinary knowledge exchange.

These initiatives reflect ESSU's commitment to extending the reach of higher education beyond formal degree programs and conventional classroom instruction. By organizing educational events, engaging external participants, and collaborating with government agencies and community partners, the University contributes to the development of informed, capable, and resilient individuals and communities.

Indicator 4.3.3: Vocational Training Events (Lifelong Learning)

Vocational Training Events for Lifelong Learning

Eastern Samar State University (ESSU) provides vocational training opportunities that extend beyond its enrolled student population, enabling members of the general public to access practical learning and skills development. Through its campuses, colleges, and partnerships with government agencies, local government units, and community-based organizations, ESSU conducts short courses designed to address the vocational and livelihood learning needs of external community beneficiaries.

These initiatives directly contribute to the indicator requirement to “Host events at university that are open to the general public: executive education programmes.” Under the Times Higher Education Sustainability Impact Ratings 2027 methodology, executive education programmes refer to short courses for people who are not attending the university. ESSU's vocational training activities provide such opportunities by extending practical instruction to community members outside its regular student population.

The University implements these activities through two approaches: ad hoc, referring to one-day training activities, and on programmed basis, referring to recurring activities conducted every month. All the documented training activities were provided free to trainees, supporting accessible lifelong learning without imposing training fees on participants.

The following activities demonstrate ESSU's provision of vocational training to external community beneficiaries and its contribution to practical skills development, livelihood learning, and community capacity-building.

I. Ad hoc Vocational Training Events

ESSU conducts ad hoc vocational training events as short courses for people who are not attending the university. These one-day activities provide focused, practical instruction in specific vocational skills and are open to the general public, particularly the identified external community beneficiaries. Each activity is conducted free to trainees and responds to a particular community learning need.

1. PAHID: A Training Workshop on Mixed Media Textile Art Printing

Implementing Campus: Main Campus–Borongan

Implementing College: College of Technology

Partner Agency: Department of Social Welfare and Development (DSWD)–4Ps, Barangay Songco, Borongan City, Eastern Samar

Date: January 17, 2025

Venue: Barangay Songco Covered Court, Borongan City, Eastern Samar

Number of Trainees: 33

Duration: 8 hours / 1 day

Training Fee: Free to trainees

Eastern Samar State University, through the College of Technology of its Main Campus–Borongan, conducted PAHID: A Training Workshop on Mixed Media Textile Art Printing on January 17, 2025, at the Barangay Songco Covered Court, Borongan City, Eastern Samar. Implemented in partnership with the Department of Social Welfare and Development (DSWD)–4Ps beneficiaries of Barangay Songco, the one-day, eight-hour vocational training accommodated 33 external community trainees.

The activity was conducted as a short course for people who are not attending ESSU. It provided an accessible opportunity for the general public, particularly the identified DSWD–4Ps community beneficiaries, to acquire practical knowledge and skills in mixed media textile art printing. The training was provided free to trainees, enabling participants to access vocational learning without paying training fees.

Impact on lifelong learning: The activity extended technical and creative learning beyond the University's enrolled student population. By providing 33 external participants with practical training in textile art printing, ESSU supported the development of creative and technical competencies that may be applied in personal projects, product development, and potential livelihood activities. The initiative demonstrates the University's contribution to accessible vocational education and community-based skills development.

2. Swine Artificial Insemination

Implementing Campus: Main Campus–Borongan

Implementing College: College of Agriculture

Partner Agency: Barangay Sabang South Local Government Unit

Date: October 18, 2024

Venue: Sabang South Covered Court

Number of Trainees: 20 swine raisers

Duration: 8 hours / 1 day

Training Fee: Free to trainees

Eastern Samar State University, through the College of Agriculture of its Main Campus–Borongan, conducted Swine Artificial Insemination on October 18, 2024, at the Sabang South Covered Court. Implemented in partnership with the Barangay Sabang South Local Government Unit, the one-day, eight-hour vocational training served 20 swine raisers from the community.

The activity was conducted as a short course for people who are not attending ESSU. It provided an opportunity for the general public, particularly local swine raisers, to access specialized agricultural learning relevant to livestock production. The training was provided free to trainees, removing training-fee barriers for the identified external beneficiaries.

Impact on lifelong learning: The training provided 20 swine raisers with access to technical learning in an agricultural field directly relevant to their livelihood activities. By extending specialized knowledge in swine artificial insemination to external community participants, ESSU supported continuing agricultural education and the development of practical competencies that may contribute to improved livestock production practices. The activity demonstrates how university expertise can be shared with community-based agricultural producers through accessible vocational training.

3. Training in Banana Chips Processing

Implementing Campus: Can-avid Campus

Implementing College: College of Business Administration (CBA)

Partner Agency: Gawad Kalinga (GK) Community Development Foundation, Inc., GK Malaintos, Dolores, Eastern Samar

Date: June 27, 2025

Venue: Gawad Kalinga Community Village, Malaintos, Dolores, Eastern Samar

Number of Trainees: 80

Duration: 8 hours / 1 day

Training Fee: Free to trainees

Eastern Samar State University, through the College of Business Administration of its Can-avid Campus, conducted Training in Banana Chips Processing on June 27, 2025, at the Gawad Kalinga Community Village, Malaintos, Dolores, Eastern Samar. Implemented in partnership with the Gawad Kalinga Community Development Foundation, Inc., through GK Malaintos, the one-day, eight-hour vocational training accommodated 80 external community trainees.

The activity was conducted as a short course for people who are not attending ESSU. It provided the general public, particularly members of the GK Malaintos community, with an opportunity to acquire practical skills in banana chips processing. The training was provided free to trainees, supporting access to vocational learning among community beneficiaries.

Impact on lifelong learning: The training provided 80 external participants with practical learning in food processing and value-adding skills. By introducing a process for transforming agricultural products into processed food products, ESSU supported the development of competencies that may be applied in household production, livelihood initiatives, and potential small-scale food enterprises. The activity demonstrates the University's contribution to community-based skills development and the accessibility of vocational learning opportunities.

Summary of Ad hoc Vocational Training Events

Training Activity	Date	Implementing College	Partner Agency	Venue	Trainees	Duration
PAHID: A Training Workshop on Mixed Media Textile Art Printing	January 17, 2025	College of Technology, Main Campus–Borongan	DSWD–4Ps, Brgy. Songco	Brgy. Songco Covered Court, Borongan City	33	8 hours / 1 day
Swine Artificial Insemination	October 18, 2024	College of Agriculture, Main Campus–Borongan	Barangay Sabang South LGU	Sabang South Covered Court	20	8 hours / 1 day
Training in Banana Chips Processing	June 27, 2025	CBA, Can-avid Campus	Gawad Kalinga Community Development Foundation, Inc.	GK Community Village, Malaintos, Dolores	80	8 hours / 1 day
				Total	**133**	**24 training hours**

All three activities were conducted by ESSU as short courses for people who are not attending the university. They were open to the general public, particularly the identified external community beneficiaries, and were provided free to trainees.

II. Vocational Training Events on Programmed Basis

ESSU also provides vocational training events on programmed basis through recurring activities conducted every month. This approach supports continuing access to practical learning opportunities for external community beneficiaries and provides a structured mechanism for livelihood skills development.

The College of Education of ESSU Guiuan Campus implements the Livelihood Training Program in partnership with the Local Government Unit of Barangay San Juan, Tubabao, Guiuan, Eastern Samar. The program is conducted at the San Juan Covered Court and serves 4Ps beneficiaries, citizens, and out-of-school youth.

The program's documented activities are presented below.

Livelihood Training Program

Training Activity	Date	Implementing Campus and College	Partner Agency	Venue	External Beneficiaries	No. of Trainees	Duration
Livelihood Skills Training on Chicken Pastel Making	October 9, 2025	Guiuan Campus, College of Education	LGU of Barangay San Juan	San Juan Covered Court, Tubabao, Guiuan, Eastern Samar	4Ps beneficiaries, citizens, and out-of-school youth	30	8 hours / 1 day
Livelihood Skills Training on Macaroons Making	November 20, 2025	Guiuan Campus, College of Education	LGU of Barangay San Juan	San Juan Covered Court, Tubabao, Guiuan, Eastern Samar	4Ps beneficiaries, citizens, and out-of-school youth	30	8 hours / 1 day
Livelihood Skills Training on Fishball Making	December 20, 2025	Guiuan Campus, College of Education	LGU of Barangay San Juan	San Juan Covered Court, Tubabao, Guiuan, Eastern Samar	4Ps beneficiaries, citizens, and out-of-school youth	30	8 hours / 1 day

Total	**90**	**24 training hours**

The Livelihood Training Program provides short courses for people who are not attending ESSU. The activities are open to the general public, particularly the identified external community beneficiaries, and are conducted free to trainees.

Through its recurring implementation, the program provides opportunities for community members to develop practical skills in food preparation and processing. The training activities may support household food production, livelihood exploration, and potential small-scale food enterprises.

Impact on lifelong learning: The programmed activities provided 90 external community participants with access to practical vocational learning through three successive training sessions. The recurring nature of the program demonstrates ESSU's commitment to extending skills development opportunities beyond a single event. By providing free training in food preparation and processing, the University supports continuing access to vocational education and the development of practical competencies that may be applied in daily life and livelihood activities.

The partnership with the Local Government Unit of Barangay San Juan further demonstrates the University's engagement with local stakeholders in delivering community-responsive learning opportunities. The program contributes to lifelong learning by providing external participants with successive opportunities to acquire vocational knowledge and skills outside the formal university system.

Livelihood Skills Training on Chicken Pastel Making

Livelihood Skills Training on Fishball Making

Livelihood Skills Training on Macaroons Making

Overall Contribution to Lifelong Learning

Through its ad hoc and on programmed basis vocational training events, Eastern Samar State University demonstrates its commitment to extending vocational learning opportunities to people who are not attending the university.

The six documented activities provided 48 training hours and accommodated a combined total of 223 trainees. The activities covered textile art printing, swine artificial insemination, banana chips processing, chicken pastel making, macaroons making, and fishball making.

These training activities demonstrate ESSU's contribution to lifelong learning through:

1. Accessible vocational education: The University provides short courses to external community beneficiaries, extending learning opportunities beyond its enrolled student population. All documented activities were free to trainees.
2. Practical skills development: The training activities provide opportunities for participants to develop vocational competencies in creative production, agricultural production, and food processing.
3. Community-responsive learning: Through partnerships with government agencies, local government units, and community-based organizations, ESSU delivers training that responds to the learning and skills development needs of external beneficiaries.
4. Livelihood capacity-building: The acquired skills may be applied in household production, agricultural activities, and potential livelihood or small-scale enterprise initiatives.

Collectively, these initiatives demonstrate ESSU's provision of vocational training events that are open to the general public, particularly identified external community beneficiaries. By offering short courses free to trainees through both ad hoc and recurring approaches, the University supports continuing access to practical learning and skills development.

The activities reflect the University's role in extending educational opportunities beyond formal degree programs and contributing to lifelong learning through accessible, community-based vocational training.

Indicator 4.3.4: Education Outreach Activities Beyond Campus

Educational Outreach Activities Beyond Campus

Eastern Samar State University (ESSU) extends educational opportunities beyond its campuses by undertaking educational outreach activities in local schools and communities. Through its academic colleges and programs, the University conducts tailored lectures, information and education campaigns (IEC), research dissemination activities, and other community-based learning initiatives that respond to the educational, environmental, social, and developmental needs of external beneficiaries.

These initiatives directly address the indicator requirement to “Undertake educational outreach activities (e.g. tailored lectures or demonstrations) beyond campus – in local schools, in the community.” Through these activities, ESSU makes academic knowledge, research findings, and relevant educational expertise accessible to learners, teachers, youth, and other community members outside the University.

The University implements educational outreach activities through two approaches: ad hoc, referring to activities conducted for one day, and on programmed basis, referring to recurring activities conducted every month. These initiatives are provided free to participants, allowing external beneficiaries to access educational opportunities without financial barriers.

Through its educational outreach initiatives, ESSU strengthens the connection between higher education and the communities it serves. These activities promote knowledge sharing, raise awareness of relevant social and environmental concerns, strengthen learning competencies, and provide opportunities for individuals outside the University to benefit from its academic and research resources.

I. Ad hoc Educational Outreach Activities

ESSU undertakes ad hoc educational outreach activities through one-day initiatives that address specific learning and information needs of external beneficiaries. These activities are conducted beyond the University's regular campus-based instruction through tailored lectures, information dissemination, and research presentations. They are open to the identified external beneficiaries and provided free of charge.

1. Balance and Bravery: Prioritizing Mental Health in Learning and Teaching

Implementing Campus: Salcedo Campus
Implementing College: College of Education
Partner Agency: Not applicable

EASTERN SAMAR STATE UNIVERSITY
Excellence • Accountability • Service

BAGONG PILIPINAS

Date: October 30, 2025 (Thursday)
Venue/Platform: Zoom Workplace
Participants: Youth, students, and teachers
Number of Participants: Not specified in the available activity information
Duration: 8 hours / 1 day
Participation: Free to participants

Eastern Samar State University, through the College of Education of its Salcedo Campus, conducted Balance and Bravery: Prioritizing Mental Health in Learning and Teaching on October 30, 2025, through Zoom Workplace. The eight-hour educational outreach activity was intended for youth, students, and teachers, extending the University's educational engagement to participants beyond its campus.

The activity provided an opportunity to share relevant knowledge and promote awareness of the importance of mental health in learning and teaching environments. By addressing mental health as an important consideration in educational settings, the initiative extended learning beyond conventional academic instruction and provided an avenue for youth, students, and teachers to engage with a topic relevant to their educational experiences and well-being.

Impact on educational outreach and awareness: The activity extended ESSU's educational engagement beyond its physical campus through an online learning platform, making educational information accessible to youth, students, and teachers. By prioritizing mental health in learning and teaching, the University contributed to awareness-building and the promotion of more supportive learning environments. The initiative demonstrates the University's role in extending relevant educational discussions and knowledge-sharing opportunities to external learners and educators.

2. DRRM for Fishermen, Islanders, and Boatmen

Implementing Campus: Main Campus–Borongan
Implementing College/Program: CANS, Bachelor of Science in Environmental Science (BSES) Program
Partner Agency: Provincial Disaster Risk Reduction and Management Office (PDRRMO)–Eastern Samar
Date: January 31, 2025
Venue: Giporlos, PGO Gymnasium, Borongan City, Eastern Samar
Number of Participants: 67
Identified Beneficiaries: Boatmen, fishermen, and islanders
Duration: 8 hours / 1 day
Participation: Free to participants

Eastern Samar State University, through the CANS Bachelor of Science in Environmental Science (BSES) Program of its Main Campus–Borongan, conducted DRRM for Fishermen, Islanders, and Boatmen on January 31, 2025, in partnership with the Provincial Disaster Risk Reduction and Management Office (PDRRMO)–Eastern Samar. The one-day, eight-hour educational outreach activity served 67 participants, particularly boatmen, fishermen, and islanders.

The activity brought disaster risk reduction and management education beyond the University's campus and directly to community members whose activities and livelihoods are closely associated with coastal and marine environments. Through the outreach initiative, ESSU extended relevant educational information to external beneficiaries, recognizing the importance of disaster preparedness and risk awareness among communities exposed to environmental and disaster-related hazards.

Impact on educational outreach and disaster awareness: The activity provided 67 boatmen, fishermen, and islanders with access to disaster risk reduction and management education. By bringing relevant knowledge directly to these community groups, ESSU supported awareness-building and strengthened opportunities for community members to understand disaster-related risks and the importance of preparedness. The initiative demonstrates the University's contribution to community-based education and the dissemination of knowledge relevant to local disaster resilience.

3. IEC on Forests Over Limestone and Presentation of Research Findings of the Conserve-Kaigangan Project

Implementing Campus: Salcedo Campus
Implementing College/Program: CANS, Bachelor of Science in Environmental Science (BSES) Program
Partner Agencies: University of the Philippines Los Baños (UPLB) Conserve-Kaigangan, Samar State University, and Giporlos National Trade School
Date: February 21, 2025
Venue: Giporlos National Trade School
Number of Beneficiaries: 60

Duration: 8 hours / 1 day
Participation: Free to participants

Eastern Samar State University, through the CANS Bachelor of Science in Environmental Science (BSES) Program of its Salcedo Campus, conducted IEC on Forests Over Limestone and Presentation of Research Findings of the Conserve-Kaigangan Project on February 21, 2025, at Giporlos National Trade School. The activity was implemented in collaboration with the University of the Philippines Los Baños (UPLB) Conserve-Kaigangan, Samar State University, and Giporlos National Trade School. It accommodated 60 external beneficiaries.

The activity combined information and education dissemination with the presentation of research findings, bringing scientific and environmental knowledge beyond the University's campus and into a local educational institution. It provided an opportunity for beneficiaries to access information about forests over limestone and learn about research findings generated through the Conserve-Kaigangan Project.

By sharing research-based information in an educational outreach setting, ESSU helped bridge the gap between academic research and community understanding. The initiative also provided an avenue for collaboration among higher education institutions and a local school in promoting environmental education.

Impact on educational outreach and environmental awareness: The activity provided 60 beneficiaries with access to research-based environmental information and educational discussions on forests over limestone. By presenting research findings outside the University, ESSU supported the dissemination and wider understanding of scientific knowledge among external learners and community stakeholders. The initiative contributes to environmental awareness and demonstrates how university research can be translated into educational outreach that informs local communities and supports environmental stewardship.

Summary of Ad hoc Educational Outreach Activities

Educational Outreach Activity	Date	Implementing Campus College/Program	Partner Agency	Venue/Platform	Beneficiaries	Duration
Balance and Bravery: Prioritizing Mental Health in Learning and Teaching	October 30, 2025	Salcedo Campus - College of Education	N/A	Zoom Workplace	Youth, students, and teachers	8 hours / 1 day
DRRM for Fishermen, Islanders, and Boatmen	January 31, 2025	Main Campus – Borongan CANS, BSES Program	PDRRMO– Eastern Samar	PGO Gymnasium, Borongan City	67 boatmen, fishermen, and islanders	8 hours / 1 day
IEC on Forests Over Limestone and	February 21, 2025	Salcedo Campus CANS, BSES Program	UPLB Conserve-Kaigangan, Samar State	Giporlos National Trade School	60 beneficiaries	8 hours / 1 day

Presentation of Research Findings of the Conserve-Kaigangan Project			University, Giporlos National Trade School			

The three activities demonstrate ESSU's implementation of one-day educational outreach initiatives beyond its campus. The documented activities in disaster risk reduction and environmental education directly identify 127 beneficiaries, while the mental health activity identifies its intended participant groups, although its actual participant count is not specified in the available information.

II. Educational Outreach Activities on Programmed Basis

In addition to ad hoc activities, ESSU undertakes educational outreach activities on programmed basis through recurring educational sessions conducted within local schools and communities. These activities provide continuing learning opportunities for external beneficiaries and establish a structured approach to extending the University's educational services beyond its campuses.

LitNum-ETP: Learning the Basics – A Writing and Speaking Workshop for High School Students

Implementing Campus: Guiuan Campus
Implementing College: College of Education
Partner Agency: Barangay Banahao Local Government Unit, community, and elementary school
Project Title: LitNum-ETP: Learning the Basics – A Writing and Speaking Workshop for High School Students
Implementing School: Banahao Elementary School
Identified Beneficiaries: Youth, particularly Grade 6 and Grade 7 students
Number of Participants per Activity: 20
Duration: 8 hours / 1 day per activity
Participation: Free to participants

Eastern Samar State University, through the College of Education of its Guiuan Campus, implements LitNum-ETP: Learning the Basics – A Writing and Speaking Workshop for High School Students in partnership with the Barangay Banahao Local Government Unit, the

community, and the elementary school. The program is conducted at Banahao Elementary School and provides recurring educational outreach activities for Grade 6 and Grade 7 students.

The program is designed to strengthen students' foundational communication competencies through structured learning sessions on storytelling, speech organization, effective speaking, and presentation skills. By conducting the activities in a local school, ESSU extends its educational services beyond its campus and makes specialized learning support accessible to young learners in the community.

The program consists of four documented learning activities conducted in August 2025:

Educational Outreach Activity	Date	Venue	Beneficiaries	Number of Participants	Duration
Storytelling Basics – Using the Right Tone: BASICS: Building Academic Skills by Integrating Composition & Speech for JHS Students	August 1, 2025	Banahao Elementary School	Grade 6 and Grade 7 students	20	8 hours / 1 day
Building a Good Speech Structure: BASICS: Building Academic Skills by Integrating Composition & Speech for JHS Students	August 8, 2025	Banahao Elementary School	Grade 6 and Grade 7 students	20	8 hours / 1 day
Applying Proper Body Language & Voice to Speak with Confidence:	August 22, 2025	Banahao Elementary School	Grade 6 and Grade 7 students	20	8 hours / 1 day

BASICS: Building Academic Skills by Integrating Composition & Speech for JHS Students					
Culminating Activity & TED Talk Presentation Day: BASICS: Building Academic Skills by Integrating Composition & Speech for JHS Students	August 30, 2025	Banahao Elementary School	Grade 6 and Grade 7 students	20	8 hours / 1 day
			Total	**80 participant-attendances**	**32 training hours**

All four activities were conducted as educational outreach sessions for learners outside ESSU and were provided free to participants. The recurring sessions progressively addressed different dimensions of communication and literacy development.

Impact on educational outreach and foundational learning: Through the four documented sessions, ESSU provided 80 participant-attendances in structured educational activities designed to strengthen students' writing, speaking, and communication competencies. The sessions addressed complementary learning areas, beginning with storytelling and the appropriate use of tone, progressing to speech organization and the effective use of body language and voice, and culminating in student presentations.

The program contributes to foundational learning by providing young learners with opportunities to develop communication skills that are essential to classroom participation, academic performance, and effective expression of ideas. The culminating presentation activity also provides an opportunity for participants to demonstrate and apply the competencies addressed in the preceding sessions.

By bringing these learning activities directly to Banahao Elementary School, ESSU extends educational support beyond its campus and provides supplementary learning opportunities to schoolchildren. The partnership with the barangay and the local school further demonstrates the University's engagement with community stakeholders in addressing educational needs at the basic education level.

The recurring implementation of the program demonstrates ESSU's contribution to continuing educational outreach. Rather than limiting the intervention to a single lecture or activity, the University provides a series of complementary learning sessions that progressively develop students' communication competencies.

Overall Contribution to Education Outreach Activities Beyond Campus

Through its ad hoc and programmed educational outreach activities, Eastern Samar State University demonstrates its commitment to extending educational opportunities and knowledge-sharing beyond its physical campuses and into local schools and communities.

The documented initiatives cover mental health awareness, disaster risk reduction and management, environmental education, research dissemination, literacy, and communication skills development. These activities respond to different learning needs among external beneficiaries, including youth, students, teachers, boatmen, fishermen, islanders, and other community members.

The University's educational outreach activities contribute to the indicator through three important areas:

1. Extension of educational opportunities beyond campus. ESSU conducts tailored educational activities in local schools, community venues, and through an online learning platform. These initiatives provide external beneficiaries with opportunities to access educational information, research findings, and specialized knowledge outside the University's regular academic environment.
2. Dissemination of relevant knowledge and research. Through disaster risk reduction education, mental health awareness, and environmental information campaigns, ESSU extends academic and research-based knowledge to individuals and communities. These activities support public awareness and enable external beneficiaries to engage with topics relevant to their educational, social, and environmental contexts.
3. Development of learning competencies among external beneficiaries. Through the LitNum-ETP program, ESSU provides structured learning sessions that support the development of foundational writing, storytelling, speech organization, and oral communication skills among young learners in a local school.

Collectively, these initiatives demonstrate ESSU's implementation of educational outreach activities beyond campus through both ad hoc and programmed approaches. By extending tailored lectures, information dissemination, research presentations, and structured learning sessions to external beneficiaries, the University strengthens its contribution to lifelong learning, community education, and the wider dissemination of knowledge.

Indicator 4.3.5: Lifelong Learning Access Policy

Eastern Samar State University (ESSU) institutionalizes its commitment to lifelong learning through university policies anchored in national laws and institutional frameworks that promote inclusive education, continuing skills development, and community empowerment. These policies establish the University's commitment to ensuring that access to lifelong learning activities is accessible to all, regardless of ethnicity, religion, disability, immigration status or gender. By extending educational opportunities beyond its formally enrolled students, ESSU recognizes lifelong learning as an essential mechanism for advancing inclusive human capital development and responding to the educational and developmental needs of diverse communities.

I. Institutional Policy Anchored in Legal and Institutional Frameworks

ESSU's policies on lifelong learning, extension services, and continuing education are anchored in the following legal and institutional frameworks in the Philippines, which provide the mandate and policy direction for the University's implementation of inclusive and accessible learning opportunities:

Republic Act No. 7722 (Higher Education Act of 1994) mandates higher education institutions to contribute to nation-building through quality education, research, and extension services, providing the foundation for ESSU's responsibility to extend the benefits of higher education to communities beyond its enrolled student population.

- Republic Act No. 10968 (Philippine Qualifications Framework Act) institutionalizes lifelong learning through the recognition of prior learning, ensuring vertical and horizontal progression across education levels and supporting opportunities for individuals to have their existing knowledge and competencies recognized.
- Republic Act No. 10533 (Enhanced Basic Education Act of 2013) promotes inclusive and relevant education responsive to community needs and global standards, reinforcing the University's commitment to accessible and relevant learning opportunities.
- Republic Act No. 8292 (Higher Education Modernization Act of 1997) grants state universities and colleges the authority to expand academic programs and engage in

extension and community development services, supporting ESSU's delivery of learning opportunities to external stakeholders.

- Philippine Development Plan and Ambisyon Natin 2040 advocate for inclusive human capital development and lifelong learning as essential elements of sustainable national progress.
- CHED Memorandum Orders (CMOs) on Extension Programs and Continuing Professional Education provide guidelines for state universities and colleges in implementing community-based and continuing education programs aligned with national development goals.

These legal and institutional frameworks guide ESSU's institutional policies and implementation of lifelong learning initiatives, ensuring that the University's educational mandate extends to continuing education, skills development, and community-based learning.

II. Inclusive Access to Lifelong Learning Opportunities

Consistent with these legal foundations, ESSU's institutional policy commitment promotes equal access to lifelong learning activities for individuals within and outside the University. Access is not limited by an individual's enrollment status or personal circumstances, including ethnicity, religion, disability, or gender. This commitment supports the participation of diverse learners, including external community beneficiaries, out-of-school individuals, workers, professionals, and other members of the public who seek opportunities to acquire new knowledge and competencies.

Through its extension, continuing education, and community-based learning initiatives, ESSU extends educational opportunities to individuals who may not otherwise have access to formal university education. This approach reinforces the University's role in making lifelong learning inclusive, responsive, and accessible to diverse segments of society.

III. Demonstrable Impact on External Beneficiaries and Communities

The implementation of ESSU's lifelong learning policies translates into opportunities for external beneficiaries to acquire knowledge, develop practical and occupational skills, improve existing competencies, and pursue continuing education beyond formal schooling. Through community-based training, vocational development, extension activities, and other lifelong learning initiatives, the University contributes to the development of individual capacities and the strengthening of community resources.

The recognition of prior learning, consistent with the Philippine Qualifications Framework, further supports learning progression by acknowledging competencies acquired

through formal, non-formal, and informal learning pathways. These opportunities contribute to skills development, improved employability, continuing professional development, and the empowerment of individuals to participate more meaningfully in economic and community activities.

At the community level, ESSU's lifelong learning initiatives strengthen the connection between higher education and local development by bringing relevant knowledge, skills, and educational resources closer to external beneficiaries. The resulting benefits extend beyond individual learning outcomes to support community capacity-building, inclusive human capital development, and sustainable development.

Through these institutional policies and initiatives, ESSU reinforces its contribution to the national lifelong learning agenda by widening access to educational opportunities, supporting the continuous development of competencies, and empowering individuals and communities through education.

Public Accessibility and Availability of Policy Evidence

ESSU maintains its commitment to transparency and accountability by making its institutional policies and relevant supporting information publicly accessible through its official communication and information platforms. The submitted evidence presents the University's adopted policy provisions, their corresponding legal and institutional foundations, the inclusive access provisions, and the intended or demonstrated benefits to external beneficiaries. The evidence is presented as a self-contained document to enable direct assessment of the University's policy commitment and its contribution to lifelong learning.

The University's policies and initiatives demonstrate how national legal mandates are translated into institutional action, expanding access to lifelong learning and strengthening the role of higher education in inclusive and sustainable community development.

EASTERN SAMAR STATE UNIVERSITY
Excellence • Accountability • Service

SUSTAINABLE DEVELOPMENT GOALS

SDG 4 QUALITY EDUCATION

4.4 Proportion of first-generation students

4 QUALITY EDUCATION

4.4.1 Indicator: Proportion of first-generation students

Reporting Period: School Year 2024–2025

Eastern Samar State University (ESSU) demonstrates its commitment to inclusive access to higher education by providing degree opportunities to students who are the first person in their immediate family to attend university at any level. For School Year 2024–2025, the University recorded 1,117 students starting a degree across its five campuses, of whom 435 were identified as first-generation students. These figures highlight the University's contribution to extending higher education opportunities to individuals whose immediate families may have had limited or no previous participation in university education.

The campus-level distribution reflects the University's reach in providing educational opportunities across Eastern Samar. Borongan Campus recorded 194 students starting a degree, including 192 first-generation students. Can-avid Campus registered 114 students starting a degree, of whom 24 were first-generation students. Maydolong Campus recorded 459 students starting a degree, including 76 first-generation students. Salcedo Campus had 111 students starting a degree, with 86 identified as first-generation students, while Guiuan Campus recorded 239 students starting a degree, including 57 first-generation students.

Based on the consolidated institutional data, the number of first-generation students starting a degree (435), divided by the total number of students starting a degree (1,117), yields a proportion of 0.3894. This demonstrates the extent to which ESSU provides opportunities for individuals who report being the first person in their immediate family to attend university at any level, consistent with the definition of first-generation students under the Times Higher Education Sustainability Impact Ratings 2027 methodology.

Beyond the enrollment figures, the participation of first-generation students represents an important dimension of higher education's contribution to social inclusion and intergenerational educational advancement. By providing access to degree programs for students without an immediate family history of university attendance, ESSU helps broaden opportunities for academic achievement, professional development, and improved socioeconomic participation. Their access to higher education also creates opportunities for educational attainment to extend beyond individual students and positively influence their families and communities.

The University's presence across Borongan, Can-avid, Maydolong, Salcedo, and Guiuan further demonstrates the importance of accessible public higher education in reaching geographically dispersed communities throughout Eastern Samar. Through its five campuses, ESSU provides opportunities for students from different localities to begin university education within their respective communities. This helps address geographical barriers to educational

participation and strengthens the role of public higher education in ensuring that disadvantaged groups are not left behind.

These institutional efforts contribute to UN Sustainable Development Goal 4, particularly Targets 4.3 and 4.5, by advancing inclusive and equitable access to quality higher education and supporting educational opportunities for groups that may experience barriers to university participation. Through the admission and participation of first-generation students, ESSU demonstrates its contribution to widening access to higher education and extending its transformative benefits to individuals, families, and communities.

Figure 2. Proportion of first-generation students

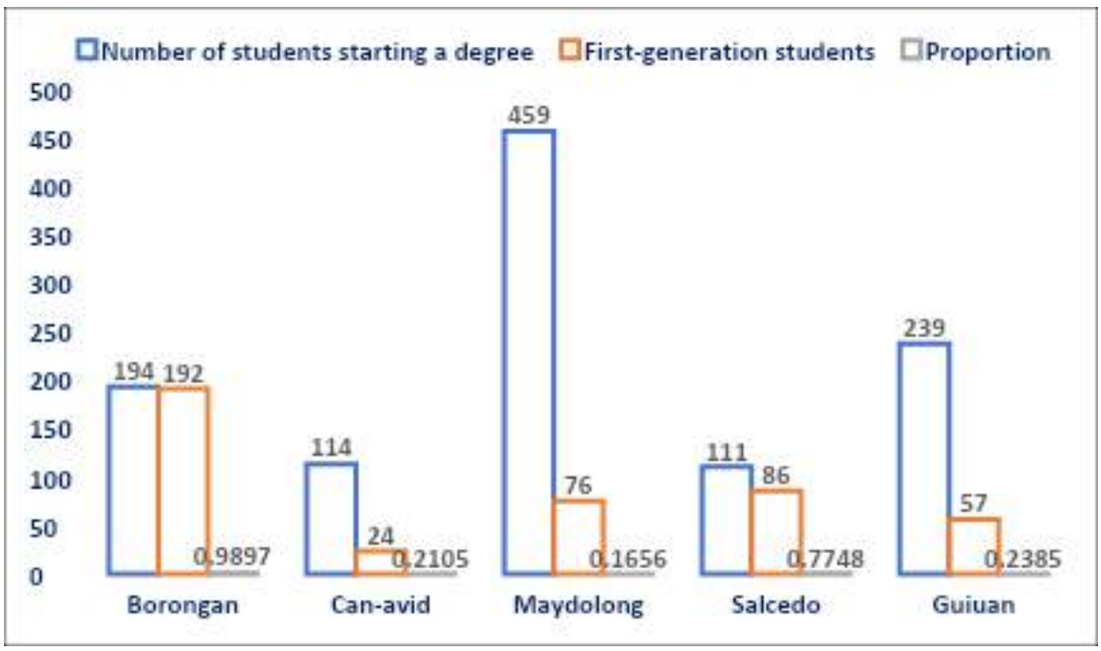

Table 1. Supporting Numerical Data

Campus	Number of students starting a degree	First-generation students	Proportion
Borongan	194	192	0.9897
Can-avid	114	24	0.2105
Maydolong	459	76	0.1656
Salcedo	111	86	0.7748
Guiuan	239	57	0.2385
Total	**1,117**	**435**	**0.3894**
